ABOUT ME

Senior Backend Developer and Team Lead with 7+ years of experience in building scalable, high-performance applications using Node.js and JavaScript. Skilled in developing RESTful APIs and microservices architecture for modern web applications. Experienced in leading backend teams, optimizing system performance, and delivering reliable solutions in agile environments. Passionate about continuous learning and building efficient backend systems that support business growth.

WORK EXPERIENCE

Team Lead | Zibtek Pvt. Ltd.

July 2023 - Present

- Leading backend development using Node.js and JavaScript to build scalable and high-performance applications.
- Designing and developing RESTful APIs and microservices architecture for enterprise-level products.
- Handling third-party integrations including payment gateway integrations (Stripe) and social media APIs (Facebook, Instagram).
- Managing and mentoring a team of developers, conducting code reviews, and ensuring best coding practices.
- Optimizing application performance, improving system reliability, and handling high user traffic.
- Collaborating with frontend teams (Angular) and product stakeholders for smooth project delivery.
- Working in Agile/Scrum environments to deliver features on time with high quality.

Senior Software Developer | Zibtek Pvt. Ltd.

Oct 2020 - Aug 2023

- Designed and developed scalable backend services and RESTful APIs using Node.js and JavaScript.
- Transitioned to a microservices-based design to support scalable deployments and better service maintainability.
- Optimized application performance by improving API response time, database queries, and system efficiency.
- Collaborated with frontend teams and stakeholders to deliver high-quality features in Agile/Scrum environment.

Software Developer | Zibtek Pvt. Ltd.

Feb 2019 - Oct 2020

- Developed backend features and APIs based on functional requirements.
- Fixed bugs, enhanced existing modules, and supported application maintenance.
- Worked with databases for data handling and query execution.
- Assisted in testing, debugging, and deployment activities.
- Collaborated with team members to deliver tasks in Agile environment.

SKILLS

- **Backend Development:** Node.js, JavaScript (ES6+), Express.js, RESTful API Development, Microservices Architecture, Authentication & Authorization (JWT, OAuth)
- **Third-Party Integrations:** Payment Gateway Integration (Stripe), Social Media APIs (Facebook, Instagram), External API Integrations, Webhooks Implementation, Payment Workflow
- **Databases & Caching:** MongoDB, MySQL, Redis, Database Design, Query Optimization, Data Modeling
- **Tools & Technologies:** Git, GitHub, Bitbucket, CI/CD Basics, Postman, Swagger, Debugging & Production Support, Agile Methodologies, Scrum

EDUCATION

Master of Computer Applications (2018)

Acharya Institute of Technology, Bangalore. | VTU

Percentage: 61.3%

Bachelor of Computer Applications (2016)

Basaveshwar Science College, Bagaakote | RCUB

Percentage: 67.4%

PROJECTS

Snapcite

October 2024 - present

Developing backend services for Snapcite, an AI-driven landmark recognition and travel content generation platform. Executed APIs for image analysis, structured data management, and asynchronous background job processing with real-time socket updates. Focused on system scalability, AI integration workflows, and efficient data handling.

Technologies: NodeJs, MongoDB, Flutter, AWS, ExpressJs, Socket Io, OpenAI, Gemini AI, Redis

Walnut Golf Club

Built and enhanced backend functionalities for Walnut Golf Club, an indoor golf simulator booking platform enabling real-time slot availability tracking, session scheduling, and tee time reservations across multiple bays. Contributed to REST API development, implementation of booking workflows, and system performance optimization to ensure a smooth user experience.

Technologies: NodeJs, MongoDB, Flutter, AWS, ExpressJs, Socket Io, Stripe Paymentgateway

Mold Ninja

Handled backend functionalities for Mold Ninja, an all-in-one field service management platform supporting scheduling, dispatch operations, invoicing, estimates, and payment processing. Contributed to scalable API design, system performance improvements, and enhancing operational efficiency for service-based businesses.

Technologies: Angular, NodeJs, MongoDB, Flutter, Twilio, AWS, ExpressJs, Socket Io, Paymentgateway.

Arsenal Mkg

Developed backend features for Arsenal CRM, a centralized platform for capturing leads from multiple sources and managing follow-ups efficiently. Implemented automated real-time responses through personalized text and email notifications, improving lead engagement and increasing sales conversations. Worked on scalable API development and system performance optimization.

Technologies: VueJS, Nodejs, JavaScript, Postgresql.

OnCourse CRM (Web Application)

Contributed to backend services for OnCourse, a sales engagement platform that integrates email marketing, SMS automation, task management, phone dialer, and CRM capabilities within a unified system. Focused on scalable API design, performance optimization, and enhancing overall sales workflow efficiency.

Technologies: Angular, NodeJs, MongoDB, Flutter, Twilio, AWS, Bootstrap, ExpressJs, etc..
